Personal Information

A motivated, adaptable, and responsible person who has devoted most of his time for building and improving his technical skills. I am currently a student at University of Ghana acquiring my bachelor's degree in Computer Science. Throughout the past years, I have developed excellent skills while working in a group to complete many projects.

Skills

I have over the past years gained experience in *Flutter/Dart, Java, HTML, CSS, Bootstrap, and Python*. Flutter/Dart is one of the top technologies I am based on aside the others mentioned.

Apart the technology aspects of my skills, I have a good communicating, time management and problem-solving skills as well.

Achievements and Projects

I have developed many apps which can be found in my github repositories @<https://github.com/samtuga1>. Below is a list of some of my favorite apps I have pushed to github. More apps can be found on my github aside these ones.

- Easy Food: A food recipe app that loads list of food depending on what the user chooses. I used an API to fetch the food in a JSON format and then decoded it.
- BMI calculator: As the name suggests, it calculates the BMI of a person. This helped in the mathematics aspect of Dart programming language.
- Instagram-clone: I implemented this app to enhance my UI designing skills.
- Shop: I learnt many tech skills upon developing this app, one of which is the provider state management.
